

### A new project.

Kilgraston School for girls wanted to implement Microsoft SharePoint to deliver a number of specific benefits to the school.

However David Hewitt the IT Manager at the school recognised that implementing any new system places two opposing stresses on an IT organisation. The first is time and the second is knowledge.

That's where we come in.

“My job is to make sure that the IT systems work and support the school’s users at all levels. As a result, I cannot plan to have the time for projects as well”

David Hewitt  
IT Manager, Kilgraston School for girls

### Share the SharePoint Load

As the school’s IT support provider, David turned to us to ask if we could help implement the new SharePoint solution that would be used to provide a new resource for the staff, department heads, students and parents..

“I have a set of school wide systems to support which are essential to both the running of the school and the students education. This is a full time job in its own right, so trying to implement a new SharePoint environment at the same time just isn’t practical,” comments David Hewitt the IT Manager for Kilgraston.

As OCD are a Microsoft Gold partner, we understand SharePoint and are qualified to deploy it for customers. We worked closely with David and the school to define and agree a project plan that would ensure that the project would deliver both a stable SharePoint environment and the business and educational benefits the school was anticipating.

The project was delivered from start to finish without the need to divert any of the Kilgraston team away from their day to day activities. As always we also delivered to timescale, cost and specification.

“The great thing for me was that I knew it would all go to plan so I could concentrate on my day job, while OCD delivered the SharePoint Project.”

### Easy Decisions

“Working with OCD is stress-free. The team are really easy to work alongside on projects like this because they take their responsibility seriously and get on with it,” states David Hewitt.

Projects like this are one of the things we do regularly so we could easily get complacent. However, we know that every organisation and every project requires the same level of detail and planning to ensure that it delivers the required results. If you have a project you need delivered then get in touch and find out why organisations like Kilgraston choose to work with us

### **What we do**

We look after and help develop our customers' IT infrastructures and ensure that they are operating efficiently and to specification. Our products and services are divided into four groups.

### **Infrastructure Supply**

We have partnerships with the leading industry vendors of hardware and software ensuring that we can supply a wide range of systems as appropriate to the needs of our customers.

### **Support and Maintenance**

OCD understands that each organisations needs are different. As a result our support and maintenance services are designed with flexibility at the core, ensuring we can support all our customers in the way they need and want.

### **Project Management and System Design**

We have proven skills and experience in designing infrastructure solutions that fit our customers' needs and project management processes that ensure we deliver on time, to budget and specification first time, every time.

### **Unified voice and data communications**

In conjunction with our strategic partners OCD can deliver fully converged voice and data solutions that deliver real benefits to the way in which organisations make use of their systems
